

Combi-CS pedestrian stacker wins prestigious IFOY Award

Combilift is a winner at this year's IFOY Awards 2020 – one of the most prestigious and keenly contested international awards in the materials handling industry which honours the best products and solutions of the year. The company won the Warehouse Truck Lowlifter Category with its innovative Combi-CS pedestrian counterbalance stacker.

The **Combi-CS** is the only pedestrian counterbalance stacker that will operate in a conventional reach truck aisle for space saving, productive storage, handling and safety. It features Combilift's unique, internationally patented and award winning multi-position tiller arm which can be turned to the left or right of the unit to position the rear drive wheel, allowing the operator to remain in the safest position - at the side of the machine rather than at the rear as is the case with other pedestrian stackers.

Combilift CEO and Co-founder Martin McVicar: "On behalf of the whole Combilift team I am delighted to receive the IFOY 2020 Award and proud that this innovative product has been recognised as valuable solution for the intralogistics sector. We extend our thanks to the IFOY jury for selecting us for this important award."

IFOY Jury's comments: "The Combi-CS is a really compact smart pedestrian operated truck and a nice hands-on solution. It offers significant added value in terms of narrow aisle operation and safety in confined environments. It is a customer-focused solution with a very high level of market relevance."
