

Virtual Event

TOWARDS A NET ZERO COLD CHAIN

	WEEK ONE 28 SEPT TO 2 OCT	WEEK TWO 5 OCT TO 9 OCT	WEEK THREE 12 OCT TO 16 OCT	WEEK FOUR 19 OCT TO 23 OCT	
	DEFINING NET ZERO	ADAPTING TO CHANGE	FUTURE OF TRANSPORT	COLD CHAIN ECOSYSTEM	
MON	HEADS UP Release of thought leadership papers on the weeks theme (email) Social media content released and repeated all week (linked-in and twitter)				On Demand
WEDS	LEADERS INTERVIEWS Pre-recorded filmed interviews with key industry leaders Released on YouTube with supporting social media				On Demand
	Tim Moran Lineage Logistics	Gavin Williams XPO Logistics	Paul Jackson Chiltern Distribution	Stephen Lawrence i-Sec/Magnavale Grp	
	WORKSHOP Presentations on content related to the theme of the week				
	<ul style="list-style-type: none"> • Tom Southall • Prof A. McKinnon • Dr Rob Lamb 	<ul style="list-style-type: none"> • Prof J Reynolds • Gavin Parnell • Kirsten Tisdale 	<ul style="list-style-type: none"> • Justin Laney • Brian Robinson • Alan Hunt 	<ul style="list-style-type: none"> • Kevin Mofid • Prof Toby Peters • Amy Shortman 	
FRI	INNOVATION ZONE Short presentation on innovations that will shape future of cold chain				Live 10:30 to 12:30 & Catch Up
	SSI Schaefer	TBA	Hultsteins	Star Refrigeration	
	WASH UP A recap and open discussion on the content of the week

COLD CHAIN LIVE! 2020

SPEAKER PROFILES

WEEK ONE – DEFINING NET ZERO

LEADERS INTERVIEW

TIM MORAN – Managing Director – Lineage Logistics UK

Tim will be talking to Shane Brennan about Lineage Logistics mission to reimagine the world's food supply chain. Having acquired the Partner Logistics and Yearsley Logistics businesses in recent years Lineage has quickly become the largest specialist third party logistics specialist in frozen food in the UK. Tim has also been the President of the Cold Chain Federation since 2017. Tim and Shane will talk about the practical ways that the cold chain can deliver robust and profitable cold chain solutions as we transition to a net zero economy.

WORKSHOP

PROFESSOR ALAN MCKINNON

Alan has been one of the world's pre-eminent experts on logistics since he was awarded his PhD in 1978. Since 2012 he has been the Head of Logistics and Dean of Programs at the Kuehne Logistics University. In this presentation Alan will share his thinking in one of his most recent areas of academic enquiry the transition to a net zero supply chain.

DR ROB LAMB

Rob is Group Sales and Marketing Director for Star Refrigeration and has spent over two decades assisting end users in the implementation and development of energy efficient cooling and heating solutions which offer the lowest total cost of ownership. In this presentation Rob will share an overview of the engineering pathway to net zero within industrial refrigeration.

TOM SOUTHALL

Tom is the Cold Chain Federation's Policy Director. He's been in post since November 2019 and brings significant experience of environmental consultancy and project management. He will present the first part of the CCF's Road to Net Zero report that will be published in early 2021.

in partnership with:

WEEK TWO – ADAPTING TO CHANGE

LEADERS INTERVIEW

GAVIN WILLIAMS – Managing Director – Supply Chain UK and Ireland XPO Logistics
Gavin leads the supply chain business of XPO Logistics in the United Kingdom and Ireland as part of the company’s global logistics network. He previously managed the business unit responsible for providing consumer services to large retailers in the UK and Ireland, with a focus on e-commerce fulfilment, reverse solutions, and integrated transportation. He will be talking about how long-term collaborations with customers are at the heart of XPO’s strategy and ongoing success.

WORKSHOP

PROFESSOR JONATHAN REYNOLDS
Jonathan is the Academic Director of the Oxford Institute of Retail Management. Jonathan is a leading expert in UK and global retailing and will be talking about the changing face of food retailing and its implications for supply chain.

GAVIN PARNELL
Gavin is a Director of the Supply Chain Consulting Group working with an enviable list of food industry, retail and third-party logistics clients to support their strategic decision making and manage change. He will be presenting on the practical and implementable ways businesses can drive efficiencies in their operations and through this meet sustainability goals.

KIRSTEN TISDALE
Based on a long experience in logistics operations, most notably at Marks and Spencer, Kirsten has become a trusted advisor of businesses across UK logistics. She will provide an overview of the strategic decision making that business must undertake in transport planning.

in partnership with:

WEEK THREE – FUTURE OF TRANSPORT

LEADERS INTERVIEW

Paul Jackson – Managing Director – Chiltern Distribution

Paul is an experienced cold chain entrepreneur having built the Chiltern brand. A hands-on leader he has built a well-respected international haulage business in the temperature controlled food and pharmaceutical industries. He has also played a key role in shaping the future direction of the Cold Chain Federation and will be talking to Shane about the future of cold chain transport.

WORKSHOP

JUSTIN LANEY

Justin is the General Manager responsible of the John Lewis and Waitrose fleet. He and his business are leading the way in technology adoption and sustainable operations. They have recently set the ambition to make their fleet fossil free by 2030. He will be talking through the plan and how he sees the ambition becoming reality.

BRIAN ROBINSON

Brian leads the Low Carbon Vehicle Partnership’s work on various van and truck-related initiatives, and acts as LowCVP’s main point of contact on freight transport emissions issues. He has over thirty years’ experience in transport, energy and climate change policy, sustainability, vehicle safety, strategic analysis, professional associations, programme leadership and managing people, projects and resources. He will provide an insight into how the decisions and pressures facing the cold chain sector fit into the wider context of government and industry policy.

ALAN HUNT

Alan is the Managing Director of Schmitz CargoBull in UK and Ireland. Schmitz are pioneering the engineering of a new generation of refrigerated trailers that go well beyond the ‘box on wheels’. He will talk about how the evolution of vehicles will bear down on running costs and emissions in an increasingly regulated and demanding supply chain environment.

in partnership with:

WEEK FOUR – COLD CHAIN ECO SYSTEM

LEADERS INTERVIEW

STEPHEN LAWRENCE – Managing Director iSec and Chief Executive Magnavale Group

Stephen first bought a cold store in 2011, since then his Magnavale business has grown to be one of the largest 3PL businesses in the UK cold chain. Also, through his i-Sec business he is involved in exciting cold chain development projects in London and elsewhere. He and Shane discuss the opportunities of UK cold chain and the scope for innovation and change at all levels.

WORKSHOP

PROFESSOR TOBY PETERS

Toby Peters is a pioneer of cold chain research, both in real world application and study of systems. He is co-inventor of the Dearman Nitrogen engine, and now focuses on academic research and advisory roles to businesses and governments around the world. He will present about the cold chain ecosystem and its role in a net zero world.

UNIVERSITY OF BIRMINGHAM

KEVIN MOFID

Kevin leads the UK research team for the industrial division at one of the UK’s leading property agencies. He will be presenting the first version of the new Cold Chain Federation/Savills collaboration to provide a definitive map of the UK cold chain.

AMY SHORTMAN

Amy is a serial innovator with extensive experience setting up secure supply chains for high-value freight and temperature sensitive freight by air, sea and road. Her experience drawn extensively in the pharmaceutical supply chain, gives her particular experience of compliance challenges in cold chain. In her current role she is leading the development of digital tools for supply chain management as Director for Product Marketing at Overhaul. She will be talking about how digital technology has the potential to unlock the pathways to secure, robust, net zero cold chain.
