## THE DEFINITIVE INDUSTRY CONFERENCE FOR THE COLD CHAIN

After three years in which the cold chain has been tested beyond anyone's lived experience, the industry comes together to reflect on what we learnt about our people, our ways of working and our resilience. Over two days delegates will hear from a who's who of the food cold chain, as well as outside voices from academia, other industries and government.

### KEYNOTE SPEAKER HIGHLIGHTS

**Paul Wilkinson** / President, Movianto UK on the story of the roll out of the covid-19 vaccine in the UK one of the most awe inspiring feats of logistics planning and delivery in UK history.

**Susan Barratt** / Chief Executive, Institute of Grocery Distribution on how the UK food retailers, manufacturers and customers expectations of the cold chain are changing.

**Lord Deben** / Chairman of the Committee on Climate Change on UK decarbonisation and how government policy is gearing up to meet the net zero by 2050 target and how this will impact business.

**Harld Peters** / President Europe, Lineage Logistics on how the European cold chain is facing into the future of food chain resilience, sustainability, and innovation.

Cold Chain Live! is brought to you in association with our Platinum Partners:

# YOUR CONFERENCE YOUR WAY

Industry leaders from across the cold chain and guests will share knowledge, experience and views on key cold chain topics across three dedicated zones including:

## LOGISTICS ZONE in partnership with UniCarriers

### ● LESSONS FROM PANDEMIC – A NEW APPRECIATION OF RESILIENCE?

How did we get through the past three years, what did we learn, what is different about cold chain now and are we ready for the challenges ahead?

### ● AUTOMATION – IS IT WORTH IT?

With big new developments, extensions and refits under construction are businesses in cold chain now fully sold on automation solutions as the answer to drive productivity and improve customer value?

### ● WHERE ARE THE PEOPLE? RESOURCING THE COLD CHAIN

The Covid-19 pandemic was a seismic event and despite lockdowns and social distancing, key workers in the cold chain stood up and kept delivering for the nation. But how were businesses able to adapt their operations to ensure food supplies were maintained and how much disruption was caused by stockpiling and hospitality closures?

## TRANSPORT ZONE in partnership with Thermo King

### ● HOW WILL WE FEED THE CITY?

With greater taxation and regulation of vehicles supplying our urban centres in the UK and across the world, how is the cold chain gearing up to meet the changing needs of consumers and the regulatory hurdles likely to get in our way.

### ● DIESEL FREE REFRIGERATION ARE WE READY?

The drive to reduce emissions and the Government's decision to remove the entitlement to use red diesel in TRUs has resulted in a flourishing market for alternative technologies. But which of these are the long-term solution to diesel and how will we overcome cost and infrastructure to transition the UK fleet?

### ● IS BREXIT DONE? THE OPPORTUNITY OF GLOBAL BRITAIN FOR COLD CHAIN

With UK now years past its decision to leave the EU single market, how is the UK doing in setting itself up to grow its imports and exports in cold chain products across the world?

## ENERGY ZONE in partnership with Star Refrigeration

### ● THE NET ZERO COLD STORE MYTH OR REALITY?

What will a cold store servicing a net zero Britain in 2050 look like, how much can be achieved through technological innovation, what are the steps along the way to the big picture vision?

### ● TAKING CONTROL OF YOUR ENERGY COSTS – USING DATA AND BENCHMARKING

How do we know how well we are doing in how our facilities and operations are performing, can we establish common ways to measure performance and empower our people to make a meaningful difference?

### ● IS GENERATING YOUR OWN POWER THE WAY OUT OF THE ENERGY CRISIS?

With our energy market in turmoil and ever-increasing prices, how easy and realistic is it to generate more of your own, how are the main technologies stacking up?
