Lineage Logistics

Our approach to the challenge of climate change

15th March 2023

Claire Walters

Regional Vice President UK Lineage Logistics

THE LINEAGE PURPOSE

To transform the food supply chain. To eliminate waste. To help feed the world.

W Lineage

Why we must act now

W Lineage

All stakeholders are increasingly pushing for change

It's demanded by our customers to meet their ESG plans Our people worry about climate change and want to work for companies with a purpose We all have increasing reporting requirements

We must treat it as a priority and make changes now

Why are Lineage committed to sustainability?

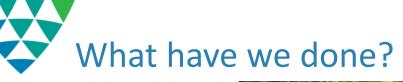

Customers are starting to push hard

Cold chain energy intensive – 2nd highest expense!

We want to leverage our global scale and take the lead

Climate pledge and critical part of ESG plan

Energy security

Signed the Climate pledge to be carbon neutral by 2040

13th largest producer of solar globally

33% energy reduction since 2015

Commitment to report on emissions across scope 1 & 2 from **2023**

A million little things.... Reimagining sustainability standards in cold chain logistics

Powering our business through solar

Investing in renewable energy 108 MW US, 34.3 MW Europe

12 sites in the UK

Solar in Bellshill, Peterborough and Heywood equivalent to **500T** carbon pa or **21k** trees

Efficiency starts with infrastructure

Retrofitting and optimising

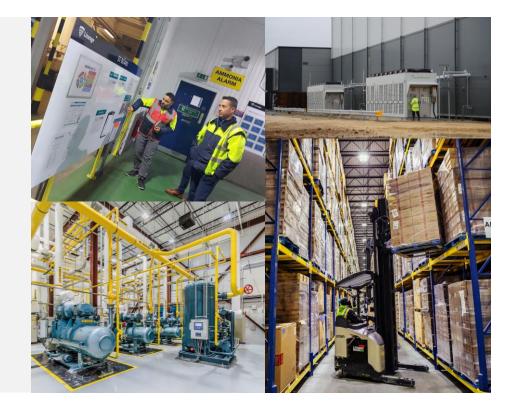

Waste walks – check evaporators, condensers, seals on valves and doors

Upgrade old refrigeration – Bellshill

LED lights – installed at all sites

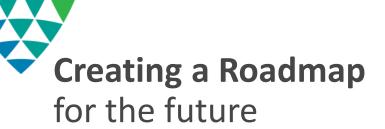

Transport

One of biggest contributors producing 14% of greenhouse gas emissions globally

Optimising routes software, network review

Maximising load fill

Targets, talking to customers

Electric trials

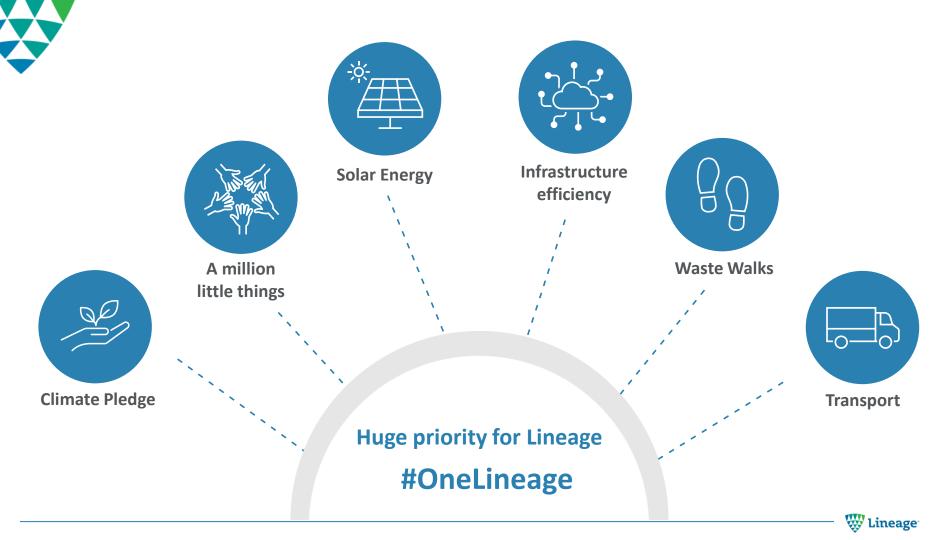

Using solar and regeneration – Sunswap, Greenchill, E-Cool, ECOGEN

Electric tractors and rigids Exploring options

CNG Trial in Scotland

Electric goats Used in US

Important to work together

Critical for....
